

Overview:

Established in 1998, Rotech Subsea is the world leader in mass flow excavation services. Having its headquarters in Aberdeen, Scotland, teams of skilled engineers work everyday to ensure the most efficient means for excavation. With new and innovative technology in high demand, Rotech Subsea has undergone rapid expansion in its field of operations and now offers world wide representation as well as a new operations facility located in Houston, Texas USA.

Rotech Subsea focuses on reliability and customer satisfaction while providing Subsea excavation for many different applications. During each and every project, team leaders with years of experience in the industry work side by side with the client to ensure the excavation depths are achieved which in turn saves them time and money.
